

Lyme Green Heat offers several wood pellet storage options to fit your space and needs. With our fully-automatic boiler systems, you will never see or touch the pellet fuel. Many sizes and configurations are available, these options ensure safe, automatic, reliable movement of the wood pellets from bulk storage to the boiler.

Multiple FleXilo sizes and options

FleXILO storage bags are well suited for indoor spaces where space is limited. Two different fuel delivery systems, auger and vacuum, allow bulk pellet storage to be located next to or up to 66 feet from the boiler.

FleXILO

Model

Capacity

W x D x H (feet)

S190H 3.0 - 3.5 tons 6.46 x 6.46 x 6.46
